

AMERICA'S BEST VALUE IN SWING SETS.™

7.0 Bengal Fort Install Manual for Double Decker

Version 8.15

Tools Needed for Assembly

| | | |
|------------------------------|---------------------------------------|---|
| Tape Measure | 24" Level | Angle Square |
| Phillips Screw Driver | 3/8" Cordless Drill or Electric Drill | 3/8" Drive Ratchet or Electric Impact Gun |
| Claw Hammer or Rubber Mallet | Pliers or Vise Grips | 7/16" Deep Well Socket |
| 9/16" Deep Well Socket | 3/4" Deep Well Socket | 1/8", 1/4", and 9/16" Drill Bits |
| Phillips Head Screw Bits | An Adult with two Adult Helpers | |

Please familiarize yourself with the install manual, parts/components and general construction process of your new swing set before getting started. Approximate assembly time: 6 to 8 hours. 6 foot unobstructed safety perimeter around swing set recommended.

Choosing A Location For Your Playset

When choosing a location for your swing set, always keep your child or children's safety in mind. Here are some recommendations to help you locate and install a safe play area.

- This play set is designed for the use of 4 occupants who have a combined weight not exceeding 800 pounds on the elevated floor; 3 occupants who have a combined weight of 525 pounds on the swing area; for a total Unit capacity of 5 occupants who have a combined weight of 1325. (this weight is not including the picnic table area)
- On-site adult supervision is required.
- The swing set should be located on level ground. The stationary components such as ladders and slides are required to be a minimum of six feet from any structure or obstruction such as a fence, garage, house, tree, overhanging branches, electrical wires, clotheslines, etc. Any swinging equipment is also required to be a minimum distance twice the height of the swing beam away from these obstructions or structures as well. The swing set should be located a safe distance from any water hazards, such as a lake, river, bayou, swimming pool, etc.
- Do not install this residential swing set in a commercial setting. This swing set is not manufactured for commercial usage and will void all warranties. Tree Frogs Wooden Swing Set Factory is not responsible for any damages or injuries resulting from this swing set being used in a commercial setting.
- Never install this swing set indoors; or over concrete, asphalt, packed earth, grass, carpet or any other hard surface. A fall onto a hard surface can result in serious or fatal injury.
- The U.S. Consumer Product Safety Commission (CPSC) recommends that you install and maintain a resilient surface under your swing set. The CPSC's Consumer Information Sheet for Playground Surfacing Materials is on the next page. A resilient surface, should be installed after the swing set has been completely assembled according to these instructions. The swing set must rest on solid ground. Please note that this swing set has a maximum fall height of 7'.

Maintaining Your Swing Set

Here are some maintenance tips required to insure safe play on your swing set for years of fun.

- At the beginning of each usage season and every two weeks during, check: nuts and bolts and tighten as needed, swing seats, chains, ladders, slides, rope and wood components for sign of deterioration and replace if necessary.
- On a yearly basis, we recommend that you coat your swing set with a sealant or preservative. You may also want to spot sand any areas prior to sealing.

**** Special note:** Although we recommend that you reseal your swing set annually, you may have to touch up the high traffic areas and/or areas that have a high exposure to direct sunlight.**

- Be sure that the sealant you select is non-toxic and child safe. Your local Tree Frogs Wooden Swing Set Factory dealer may offer a complete power wash and reseal and maintenance program.
- Do not use line trimmers or "weed eaters" around your swing set. The line will remove both paint and wood from uprights and base pieces. Any damage resulting from this type of abuse is not covered under our limited warranty.
- Remove plastic swing seats and take in doors or do not use when temperature drops below 0°F.

Weight Limits for Tree Frogs Swing Sets

Fort Platform: 800 Lbs. Total Weight

Swing Belts: 175 Lbs.

Trapeze: 125 Lbs.

Full Bucket Swing: 50 Lbs.

Toddler Bucket Swing: 50 Lbs.

Tire Swing: 125 Lbs. Total Weight

Rope Ladder: 75 Lbs.

Rock Wall: 150 Lbs.

All Slides: 125 Lbs.

Tree Frogs recommends that the weight limits for all components must not be exceeded. Failure to adhere to these and other safety guidelines could result in damage to the swing set and/or injury to the users.

Please keep this install manual for future reference.

To insure SAFE PLAY adults must teach children:

- Not to walk close to, in front of, behind, or between moving items.
- Not to swing empty swing seats.
- Not to swing sideways into the path of adjacent swings.
- Not to use the swing set in a manner other than that for which it is intended.
- Not to get off the equipment while it is in motion.
- Not to jump off the tower.
- Not to stand in the swing seats.
- Not to swing so high that chains become slack, or above the height of the swing support.
- Not to jump on a slide.
- Not to climb on top of the swing support.
- Not to attach to the swing set any item that is not specifically designed for use with the equipment, such as (but not limited to) jump ropes, clotheslines, pet leashes, cables, and chains. These may become strangulation hazards.
- To hold on to swings and climbers with both hands.
- To slide feet first, never head first.
- To watch for other children while swinging or playing near the swing set.

To also insure SAFE PLAY adults must:

- Limit climbing and swinging heights to each child's ability.
- Verify that suspended climbing ropes are secured at both ends.
- Verify that suspended climbing ropes cannot be looped back on themselves.
- Dress children appropriately for play. Use well-fitted shoes that do not have slippery soles.
- Avoid ponchos, scarves, hoods, loose fitting clothing, neckties, and any clothing with a drawstring. Serious injury could result should any part of the children's clothing become entangled in the swing set.
- Do not allow children to play wearing helmets.
- Remember that children are inventive. When they develop games that are unsafe, be alert and change the rules.

IMPORTANT - PLEASE READ

As fresh lumber acclimates to its new environment, the natural tendencies of the tree can show itself in the form of checks, or "cracks" in the lumber. In almost all cases this is normal and it will not affect the structural integrity of your play set.

Cosmetic defects that do not affect the structural integrity of the product, or natural defects of wood such as warping, checking or any other physical properties of wood that do not present a safety hazard, are not covered by this warranty.

Defects that develop because the product is exposed to extreme climate conditions are not covered by this warranty.

Defects that develop as a result of faulty or improper installation of the product are also not covered by this warranty.

Most cracks are not warrantable, however if you believe that the integrity of your play set is compromised by this natural occurrence, please contact the Tree Frogs Swing Set Dealer that you purchased your swing set from.

We appreciate your purchase and know that you will enjoy your play system for many years to come.

Pre-Assembly Hints

- Depending on your experience, assembly of our play sets can take as little as 6 hours up to 24 hours, depending on size, after inventory of parts; therefore, we recommend you set aside a full two days for assembly.
- Identify all of the parts for your play set. Empty each box and lay out boards so you can see each part. Your instruction book will have detailed drawings that will make it easy for you to recognize individual parts. Keep all hardware and metal parts separate from wooden pieces.
- After everything is laid out, check carefully to ensure all parts are present. Make sure there are no broken boards.
- Find an area to sort your hardware. It is best to open the hardware on a solid surface so that you do not lose any pieces in the grass. This will save time and familiarize you with all the different pieces in the hardware bag.

****Important note:** Wood has some natural defects such as knots, surface cracks, etc... We reject parts that are structurally defective. We use a high quality lumber in our structures; however, you should inspect each part for splinters or rough spots and sand them smooth to prevent injury.**

- After familiarizing yourself with all of the components, read all instructions thoroughly. Reading instructions after you have studied the parts will help you understand more clearly the installation process, and help to eliminate unnecessary mistakes.
- Pay close attention to the diameter and length of each bolt and screw.
- Never tighten hardware completely at first. It helps to have some adjustment for bolt alignment while you are attaching parts together. After everything is square, tighten each joint.
- After the main unit is assembled it is critical that the floor is level and square. If the main frame is not level, the walls and floor will be out of square.
- After you complete installation, make sure every bolt, screw, and nut is tight, and every board is secure. Wood will expand and contract with the seasons.
- Place the set on level ground, not less than 6ft from any structure or obstruction such as a fence, garage, house, overhanging branches, laundry lines, or electrical wires.
- All 1/4" and 3/8" lag bolts must have pre-drilled holes 1-1/2" to 2" deep. Use a 1/8" drill bit for the 1/4" lag bolts and 1/4" drill bit for 3/8" lag bolts. Use pre-drilled holes in facias as a reference for placing lag bolt pilot holes.
- If a board lifts or rises causing a gap between boards when running in lag bolts or screws, back out the screw or lag bolt and press or apply pressure (but not enough to crack or break board) while re-running in the lag bolt or screw in the same hole.
- Do not over tighten bolts, lag bolts or screws. You can damage boards, break hardware, and/or strip out the hardware.
- When using hammer do not beat on the hardware, but gently tap it in. Never beat on the wood as it will leave marks.

Leveling Your Swing Set During Assembly

- Complete the steps which will be the basic frame of the fort {i.e. four corner posts with base (sand box boards) and deck supports}
- Position in the most level area chosen for the play set, keeping in mind the location and size of the swing beam, ladder, slides, etc. that extend off the fort.
- Once the frame is in the final position, check for vertical and horizontal levelness to determine which side(s) will need to be dug into the ground to level the play set.
- With a shovel, score the ground around the outside edges of the sandbox boards on the 'high' side of the fort. This is the area that will be dug in. Make sure to score deep enough; the scored lines will be your digging template.
- Push the frame off and away from the scored area, far enough to dig and remove dirt to reach the appropriate depth.
- Dig a channel along the scored line(s) for the base of the fort (corner post and sandbox boards) to rest into. Dig the channel(s) to the same level depth. The bottom of the channel(s) should be level to each other so your frame doesn't teeter or rock because the channel(s) are uneven.
- Once you have removed enough grass and dirt, slide/push the frame into the channel(s). Place a level on the vertical and horizontal boards of the frame to determine if enough soil, or too much, was removed.
- Repeat this process until the basic frame is plumb and level and in its final position before completing the rest of the assembly.
- Measure to make sure fort is square.

**** Important:** if you require a channel depth of more than 6",
then we recommend you have your play set area professionally graded before completing assembly. **

CONSUMER INFORMATION SHEET FOR PLAYGROUND SURFACING MATERIALS

The U.S. Consumer Product Safety Commission (CPSC) estimates that about 100,000 playground equipment related injuries resulting from falls to the ground surface are treated annually in U.S. hospital emergency rooms. Injuries involving this hazard pattern tend to be among the most serious of all playground injuries, and have the potential to be fatal, particularly when the injury is to the head. The surface under and around playground equipment can be a major factor in determining the injury-causing potential of a fall. It is self-evident that a fall onto a shock-absorbing surface is less likely to cause a serious injury than a fall onto a hard surface. However, it should be recognized that some injuries from falls will occur no matter what playground surfacing material is used.

Playground equipment should never be placed on hard surfaces such as concrete or asphalt. Grass may appear to be acceptable, but can turn to hard packed earth in areas of high traffic. Shredded bark mulch, wood chips, or fine gravel are considered to be acceptable shock absorbing surfaces when installed and maintained at a sufficient depth under and around play equipment.

TABLE 1 -CRITICAL HEIGHTS (in feet) OF TESTED MATERIAL

| MATERIAL | UNCOMPRESSED DEPTH | | | COMPRESSED DEPTH |
|----------------------------|--------------------|--------|---------|------------------|
| | 6 Inch | 9 Inch | 12 Inch | 9 inch |
| Wood Chips | 7 | 10 | 11 | 10 |
| Double Shredded Bark Mulch | 6 | 10 | 11 | 7 |
| Engineered Wood Fibers | 6 | 7 | >12 | 6 |
| Fine Sand | 5 | 5 | 9 | 5 |
| Coarse Sand | 5 | 5 | 6 | 4 |
| Fine Gravel | 6 | 7 | 10 | 6 |
| Medium Gravel | 5 | 5 | 6 | 5 |
| Shredded Tires** | 10-12 | N/A | N/A | N/A |

** This is data from tests conducted by independent testing laboratories on a 6 inch depth of uncompressed shredded tire samples produced by four manufacturers. The test reported critical heights, which varied from 10 feet to greater than 12 feet. It is recommended that persons seeking to install shredded tires as a protective surface request test data from the supplier showing the critical height of the material when it was tested in accordance with ASTM F1292.

Table 1 should be read as follows: If, for example, uncompressed wood chips are used at a minimum of 6 inches, the Critical Height is 7 feet. If 9 inches of uncompressed wood chips are used, the Critical Height is 10 feet. It should be noted that, for some materials, the Critical Height decreases when the material is compressed. It is recommended that a shock absorbing material should extend a minimum of 6 feet in all directions from the perimeter of stationary equipment such as climbers and slides. However, because children may deliberately jump from a moving swing, the shock absorbing material should extend in the front and rear of a swing a minimum distance of 2 times the height of the pivot point measured from a point directly beneath the pivot on the supporting structure.

This information is intended to assist in comparing the relative shock-absorbing properties of various materials. No particular material is recommended over another. However, each material is only effective when properly maintained. Materials should be checked periodically and replenished to maintain correct depth as determined necessary for your equipment. The choice of a material depends on the type and height of the playground equipment, the availability in your area, and its cost.

This information has been extracted from the CPSC publications "Playground Surfacing-Technical Information Guide" and "Handbook for Public Playground Safety." Copies of these reports can be obtained by sending a postcard to:

BFH-8- 1/4" x 3" Hex Lag Screw- (4)
 BFH-9- 1/4" x 4 1/2" Hex Lag Screw- (8)
 BFH-7- 1/4" x 2" Hex Lag Screw- (8)
 BFH-16- 1/4" USS Flatwasher- (12)

Bengal Main Assembly

PARTS NEEDED

RW-8- Universal Entrapment Block- (2)
Rockwall Assembly- (1)

HARDWARE NEEDED

RWH-4- 3/8" x 5" Hex Lag Screw- (6)
RWH-5- 3/8" USS Flatwasher- (6)

Bengal Main Assembly

PARTS NEEDED

RW-7- Universal Rope Block- (1)
BTB-2- Universal Tarp Board- (3)

Bengal Tarp Assembly

HARDWARE NEEDED

RWH-4- 3/8" x 5" Hex Lag Screw- (2)
RWH-5- 3/8" USS Flatwasher- (2)
BFH-9- 1/4" x 4 1/2" Hex Lag Screw- (6)
BFH-16- 1/4" USS Flatwasher- (6)

Tarp Installation

HARDWARE NEEDED

Tarp Snaps with Tarp-

(8)

Take one corner of the VINYL TARP and place it flush in the corner. Tap the snap with a blunt object, leaving an indentation of the snap in the wood. Repeat this process until all the snaps have been indented in the wood on both side.

Using the indentions you just made with the snaps, take the 5/8" PHILLIPS SCREW SNAPS and drill one into each indentation

Take the corner of the VINYL TARP and start placing the snaps on the PHILLIPS SCREW SNAPS. Fold the VINYL TARP over the top of the UNIVERSAL TARP BOARD. Pull tight and place the snaps on the PHILLIPS SCREW SNAPS.

Bengal Fort Wood Roof

PARTS NEEDED

| | |
|------------------------------------|-----|
| WRB-5- Ben Fort Fan Board #1- | (4) |
| WRB-6- Ben Fort Fan Board #2- | (8) |
| WRB-7- Ben Fort Fan Board #3- | (4) |
| WRB-8- Ben Fort Fan Board #4- | (4) |
| WRB-1- Bengal Fort WR Support (R)- | (2) |
| WRB-2- Bengal Fort WR Support (L)- | (2) |

HARDWARE NEEDED

| | |
|-------------------------------------|------|
| BRH-5- 1 5/8" Coated Deck Screw- | (48) |
| BRH-7- 3/8" x 5 1/2" Carriage Bolt- | (4) |
| BRH-3- 1/2" USS Flatwasher- | (4) |
| BRH-1- 3/8" USS Flatwasher- | (4) |
| BRH-8- 3/8" Split Lockwasher- | (4) |
| BRH-10- 3/8" Hex Nut- | (4) |
| BRH-11- 3/8" Acorn Nut Plated- | (4) |

Make 4 of these for both Wood Roofs

Bengal Fort Wood Roof

PARTS NEEDED

Fan Assembly- (2)
WRB-3- Bengal Fort WR Center Support- (2)
WRB-4- Bengal Fort Wood Roof Board- (8)

HARDWARE NEEDED

BRH-5- 1 5/8" Coated Deck Screws- (60)

Repeat for both sides of Wood Roof

Bengal Fort Wood Roof

PARTS NEEDED

WRB-4- Bengal Fort Wood Roof Board- (12)
WRB-9- Universal WR Peak Facia- (2)

HARDWARE NEEDED

BRH-5- 1 5/8" Coated Deck Screw- (76)

Repeat for both sides of Wood Roof

Bengal Main Assembly

PARTS NEEDED

PIC-2- Uni. Fort Picnic Table Supports- (2)
Picnic Seat Assembly- (2)

HARDWARE NEEDED

PH-3- 3/8" x 3 1/2" Hex Lag Screw- (4)
PH-5- 3/8" USS Flatwasher- (4)
PH-2- 1/4" x 4 1/2" Hex Lag Screw- (8)
PH-4- 1/4" USS Flatwasher- (8)

Bengal Main Assembly

PARTS NEEDED

PIC-2- Uni. Fort Picnic Table Supports- (2)

HARDWARE NEEDED

PH-3- 3/8" USS Flatwasher- (4)

PH-4- 1/4" USS Flatwasher- (4)

PH-2- 1/4" x 4 1/2" Hex Lag Screw- (4)

PH-5- 3/8" x 3 1/2" Hex Lag Screw- (4)

There is a 22" gap from the ground to the bottom of the support

Double Decker Wall Assembly

PARTS NEEDED

BDC-1- Uni. Fort 4- Hole Facia- (2)
 BDC-6- Fort DD Corner Post- (2)
 BDC-3- Uni. Fort Mainbeam- (1)
 BFU-4- Uni. Fort Trapeze Arm- (1)

HARDWARE NEEDED

| | |
|-------------------------------------|---|
| DDH-12- 3/8" USS Flatwasher- (8) | DDH-7- 3/8" x 3 1/2" Hex Lag Screw- (8) |
| DDH-2- 1/2" x 7" Carriage Bolt- (4) | DDH-14- 3/4" USS Flatwasher- (4) |
| DDH-13- 1/2" USS Flatwasher- (4) | DDH-10- 1/2" Split Lockwasher- (4) |
| DDH-3- 1/2" Hex Nut- (4) | DDH-1- 1/2" Acorn Nut Plated- (4) |

Double Decker Wall Assembly

PARTS NEEDED

BDC-4- (L) Gusset Bracket-
 BDC-5- (R) Gusset Bracket-
 BDC-9- Uni. Fort Center Upright-
 STB-4- Ductile Hangers-

(1) DDH-12- 3/8" x 3 1/2" Hex Lag Screw-
 (1) DDH-2- 1/2" x 7" Carriage Bolt-
 (1) DDH-13- 1/2 USS Flatwasher-
 (2) DDH-3- 1/2" Hex Nut-
 BFH-6- 3/8" x 5" Hex Bolt-
 BFH-17- 3/8" USS Flatwasher-
 BFH-12- 3/8" Nylon Insert Locknut-

HARDWARE NEEDED

(4) DDH-7- 3/8" USS Flatwasher-
 (2) DDH-14- 3/4" USS Flatwasher-
 (2) DDH-10- 1/2" Split Lockwasher-
 (2) DDH-1- 1/2" Acorn Nut Plated-
 (4) BFH-4- 3/8" Bolt Cup-
 (4) BFH-14- 3/8" Split Lockwasher-
 (4) BFH-1- 3/8" Acorn Nut Plated-

Double Decker Ladder

PARTS NEEDED

| | |
|-------------------------------------|------|
| BDC-16- Uni. Fort Ladder Step- | (5) |
| BDC-14- Fort Left Ladder Leg- | (1) |
| BDC-15- Fort Right Ladder Leg- | (1) |
| BDC-11- Double Decker Rail Bottom- | (1) |
| BDC-12- Double Decker Rail Bottom- | (1) |
| BDC-13- Double Decker Rail Spindle- | (13) |

Double Decker Rail

HARDWARE NEEDED

| | |
|-------------------------------------|------|
| DDH-6- 1/4" x 4 1/2" Hex Lag Screw- | (20) |
| DRH-1- 2 1/2" Coated Deck Screw- | (52) |

Double Decker Assembly

PARTS NEEDED

BDC-3- Universal Fort Mainbeam- (1)

HARDWARE NEEDED

DDH-2- 1/2" x 7" Carriage Bolt- (2)

DDH-14- 3/4" USS Flatwasher- (2)

DDH-13- 1/2" USS Flatwasher- (2)

DDH-10- 1/2" Split Lockwasher- (2)

DDH-3- 1/2" Hex Nut- (2)

DDH-1- 1/2" Acorn Nut Plated- (2)

For this step we need to clamp the BDC-3 at 57 1/2" to the Bengal Corner Posts and drill a 9/16" hole through the Mainbeam and Corner Posts

Double Decker Assembly

PARTS NEEDED

BDC-7- Universal Fort 8 Hole Facia- (2)

HARDWARE NEEDED

DDH-7- 3/8" x 3 1/2" Hex Lag Screw- (8)

DDH-12- 3/8" USS Flatwasher- (8)

Double Decker Assembly

PARTS NEEDED

Universal Deck- (2)
BFU-10- Universal Rail Bottom- (1)

HARDWARE NEEDED

DDH-11- 1/4" USS Flatwasher- (18)
DDH-6- 1/4" x 4 1/2" Hex Lag Screw- (16)
DDH-4- 1/4" x 3" Hex Lag Screw- (2)

Double Decker Assembly

PARTS NEEDED

Ladder Assembly- (1)
BDC-10- Universal 6 Hole Facia- (2)

HARDWARE NEEDED

DDH-12- 3/8" USS Flatwasher- (10)

Double Decker Assembly

PARTS NEEDED

DTB-1- Double Decker Tarp Center Post- (1)
BDC-11- Double Decker Rail Bottom- (1)

HARDWARE NEEDED

DDH-12- 3/8" USS Flatwasher- (6)
DDH-8- 3/8" x 5" Hex Lag Screw- (2)
DDH-7- 3/8" x 3 1/2" Hex Lag Screw- (4)
DDH-11- 1/4" USS Flatwasher- (2)
DDH-5- 1/4" x 3" Hex Lag Screw- (2)

Skip Step if you have a Wood Roof

Double Decker Wood Roof

PARTS NEEDED

DWR-11- Universal Fort WR Center Post- (2)

HARDWARE NEEDED

DDH-12- 3/8" USS Flatwasher- (6)

DDH-7- 3/8" x 3 1/2" Hex Lag Screw- (4)

DDH-8- 3/8" x 5" Hex Lag Screw- (2)

Double Decker Assembly

PARTS NEEDED

Double Decker Rail- (1)
Uni. Rail Assembly- (4)

HARDWARE NEEDED

DDH-6- 1/4" x 4 1/2" Hex Lag Screw- (10)
DDH-11- 1/4" USS Flatwasher- (20)
DDH-4- 1/4" x 2" Hex Lag Screw- (10)

Double Decker Wood Roof

PARTS NEEDED

DWR-1- Bengal Fort WR Support (R)- (2)
DWR-2- Bengal Fort WR Support (L)- (2)

DWH-8- 3/8" x 5 1/2" Carriage Bolt- (2)
DWH-1- 3/8" USS Flatwasher- (4)
DWH-10- 3/8" Hex Nut- (2)
DWH-2- 3/8" x 3 1/2" Hex Lag Screw- (2)

HARDWARE NEEDED

DWH-3- 1/2" USS Flatwasher- (2)
DWH-9- 3/8" Split Lockwasher- (2)
DWH-11- 3/8" Acorn Nut Plated- (2)
DWH-7- 2 1/2" Coated Deck Screw- (2)

LEAVE SLIGHTLY LOOSE AND TIGHTEN AFTER NEXT STEP

Double Decker Wood Roof

PARTS NEEDED

Fan Assembly- (2)
DWR-4- Bengal Fort Wood Roof Board- (4)
DWR-3- Bengal Fort WR Center Support- (1)

HARDWARE NEEDED

DWH-6- 1 5/8" Coated Deck Screws- (40)

Double Decker Wood Roof

PARTS NEEDED

DWR-5- Bengal Fort WR Board- (10)
DWR-4- DD WR Center Support- (1)

HARDWARE NEEDED

DWH-6- 1 5/8" Coated Deck Screws- (50)

Double Decker Wood Roof

PARTS NEEDED

DWR-5- Bengal Fort WR Board- (3)
DWR-10- Universal WR Peak Facia- (2)

HARDWARE NEEDED

DWH-6- 1 5/8" Coated Deck Screw- (19)

Double Decker Tarp Assembly

PARTS NEEDED

DTB-2- Universal Tarp Board- (3)

HARDWARE NEEDED

DDH-11- 1/4" USS Flatwasher- (6)

DDH-6- 1/4" x 4 1/2" Hex Lag Screw- (6)

Double Decker Tarp Assembly

PARTS NEEDED

Double Decker Tarp- (1)
Slide- (1)

Repeat the tarp install process from before.

Accessory Installs

HARDWARE NEEDED

BFH-13- #14 x 1 1/4" Pan Phillips T/S- (2)
BFH-16- 1/4" USS Flatwasher- (2)

Accessory Installs

PARTS NEEDED

Wave Slide- (1)
STB-2- 1 1/4" Playgrip Safety Handle- (2)

HARDWARE NEEDED

BFH-20- #14 x 2" Pan Phillips T/S- (7)
BFH-16- 1/4" USS Flatwasher- (7)

Accessory Installs

PARTS NEEDED

STB-2- 1 1/4" Playgrip Safety Handle- (3)
STB-3- 1 1/4" Playgrip Ladder Handle- (2)

HARDWARE NEEDED

BFH-20- #14 x 2" Pan Phillips T/S- (10)
BFH-16- 1/4" USS Flatwasher- (10)

Accessory Installs

PARTS NEEDED

STB-6- Fort Ladder Bracket- (1)
DDB-2- Binoculars w Hardware- (1)

HARDWARE NEEDED

BFH-10- 3/8" x 3 1/2" Hex Lag Screw- (2)
BFH-17- 3/8" USS Flatwasher- (2)

Accessory Installs

PARTS NEEDED

DDB-1- 19" Ship's Wheel- (1)
BBD-3- Telescope- (1)

HARDWARE NEEDED

Hardware w/ Accessories

Accessory Installs

PARTS NEEDED

STB-5- Spring Clip- 10 x 100mm- (2)
DDB-4- 20" Trapeze Bar w/ Rings- (1)

None

HARDWARE NEEDED

Quick Reference Guide #1

For 5.8' Deck Height

NOTE: To spiral in the opposite direction, apply CW turns instead of CCW and vice versa. Turns may need to be adjusted depending on the level of the land.

Quick Reference Guide #2

For 5' & 7' Deck Heights

NOTE: To spiral in the opposite direction, apply CW turns instead of CCW and vice versa. Turns may need to be adjusted depending on the level of the land.

Quick Reference Guide #3

For 6.5' Deck Height

NOTE: To spiral in the opposite direction, apply CW turns instead of CCW and vice versa. Turns may need to be adjusted depending on the level of the land.

Step #1

Assemble the Elbow Section Halves together with the hardware as shown.
Note the position of the Overlap Flanges in relation to the direction of the Bolts.

Step #2

Using Nuts, Washers and Bolts, attach the 10 ° Elbow to Entry Panel in the "Quick Reference" orientation.

Step #3

After properly blocking the slide entrance on the playset, attach the Entry Chute/first Elbow assembly to the playset with the Lag Screws and Washers provided.

Step #4

Using Nuts, Washers and Bolts, attach the 30 ° Elbow to the previous Elbow in the "Quick Reference" orientation.

Step #5

Using Nuts, Washers and Bolts, attach the 90 ° Elbow to the previous Elbow in the "Quick Reference" orientation.

Step #6

Using Nuts, Washers and Bolts, attach the 2nd 90 ° Elbow to the previous Elbow in the "Quick Reference" orientation.

Step #7

Using Nuts, Washers and Bolts, attach the 3rd 90 ° Elbow to the previous Elbow in the "Quick Reference" orientation.

Step #8

Place the end of the Exit Chute up against the last Elbow Section and make it level with the ground. If any of the last Elbow bolt holes line up with the Exit Chute attach with Bolts and Washers (possibly 2 Places). For all the holes that don't line up attach with Lag Screws and Washers. (as many as 12 places) Start each Bolt by hand before tightening. Be careful not to overtighten the Lag Screws into the soft plastic.
